FEASTIVAL

CYSTIC FIBROSIS FOUNDATION

KASEY SEYMOUR | WHY SUPPORT CFF

I have struggled with CF my entire life. I was diagnosed with CF when I was 4.5 at Johns Hopkins. Like most CFer I have been in and out of the hospital more times than I can count, my drug list is as long as my arm, and IV antibiotics became as predictable as the change in seasons. After years of battling the disease I was given a second chance at life when I received a double lung transplant in June 2016. Since my transplant my lung function has been higher than I ever thought it could be, and two years after my transplant I was able to marry my best friend! Although my wedding is a day I will never forget, it also taught me that transplant is not a cure. After my wedding my lung function fell, and I have been working to regain it once again. Although I still struggle with CF and transplant complication I treasure everyday and am grateful for my family and friends, my doctors and nurses, the CF foundation and my donor. They are the reason that I am alive today!

The Cystic Fibrosis Foundation has unrestricted financial reserves of about 13 times its 2018 budgeted expenses, following a one-time royalty sale in 2014. These funds, along with the public's continuing support, are needed to help accelerate our efforts to pursue a cure for this fatal disease, fund development of new therapies, and help all people with CF live full, productive lives. To obtain a copy of our latest Annual Report, visit <https://www.cff.org/About-Us/Reports-and-Financials/>, email info@cff.org or call 1-800-FIGHT-CF.

Documents and information submitted under the Maryland Solicitations Act are available, for the cost of postage and copies, from the Secretary of State, State House, Annapolis, MD 21401, or 410-974-5534.

Important Note on Attendance at Foundation Events: To reduce the risk of getting and spreading germs at CF Foundation-sponsored events, we ask that everyone follow basic best practices by regularly cleaning your hands with soap and water or with an alcohol-based hand gel, covering your cough or sneeze with a tissue or your inner elbow and maintaining a safe 6-foot distance from anyone with a cold or infection.

Medical evidence shows that germs may spread among people with CF through direct and indirect contact as well as through droplets that travel short distances when a person coughs or sneezes. These germs can lead to worsening symptoms and speed decline in lung function. To further help reduce the risk of cross-infection, the Foundation's attendance policy recommends that all people with CF maintain a safe 6-foot distance from each other at all times while attending an outdoor Foundation-sponsored event.
