

### Meet Beckham (age 3):

Beckham is from Fishers, Indiana. Shortly after birth, Beckham was diagnosed with a genetic disease called cystic fibrosis (CF). Every day, we fight for Beckham and the other 740 Hoosiers living with CF. The improvements we have made since the Foundation was formed in 1955 are dramatic. At that time there was little hope for CF patients to live past the age of five. Fast forward to 2019... The CF Foundation is at the forefront of developing new therapies and treatments that are changing the lives of those living with CF. Drugs that treat the genetic cause of CF are rapidly becoming available to more individuals as a result of the Foundation's efforts. There are now three FDA-approved therapies that treat the basic defect in cystic fibrosis for more than half of the population. Perhaps most exciting, more and more people will be helped by these treatments in coming years. With your help, we are confident that we can take our progress to the next level and make CF stand for Cure Found. Won't you join us on this incredible journey and change the lives of those with cystic fibrosis?

The Cystic Fibrosis Foundation has unrestricted financial reserves of about 10 times its budgeted 2019 annual expenses, following a one-time royalty sale in 2014. These funds, along with the public's continuing support, are needed to help accelerate our efforts to pursue a lifelong cure for this fatal disease, fund development of new therapies and help all people with CF live full, productive lives. **Important Note on Attendance at Foundation Events:** To reduce the risk of getting and spreading germs at CF Foundation-sponsored events, we ask that everyone follow basic best practices by regularly cleaning your hands with soap and water or with an alcohol-based hand gel, covering your cough or sneeze with a tissue or your inner elbow and maintaining a safe 6-foot distance from anyone with a cold or infection.

Medical evidence shows that germs may spread among people with CF through direct and indirect contact as well as through droplets that travel short distances when a person coughs or sneezes. These germs can lead to worsening symptoms and speed decline in lung function. To further help reduce the risk of cross-infection, the Foundation's attendance policy recommends inviting only one person with CF to attend the indoor portion of a Foundation-sponsored event at a specific time. For the outdoor portion, the Foundation recommends that all people with CF maintain a safe 6-foot distance from each other at all times.
