

AIDS Walk San Francisco 2020

Streaming App Guide

Google Hangouts

- Available via web and mobile app
- Integrated into your Gmail account
- Easily schedule your chats with Google Calendar
- Hangouts can include up to 150 people, but video calls with standard accounts can only include up to 10. Upgrade to business for 25!
- Learn more about capabilities [here](#) > select drop menu in left corner
- Help section [here](#)

Facebook Messenger

- Doesn't require any additional download from Facebook
- Video chat includes up to 8 people
- Learn more about capabilities [here](#)
- Help section for video chat [here](#)

Facetime on Apple Products

- Works on iPhones, iPads, and iMacs, and Macbooks
- Up to 32 friends on Facetime at the same time!*
- Learn more about capabilities and help section [here](#)

Zoom

- Web browser available but works best with downloaded desktop version; mobile app also available.
- Digital filters and virtual greenscreen backgrounds to spice it up
- Easiest to see all of your friends at one time
- Free version only allows up to 40 minute calls. After that you'll have to start a new session and reconnect to keep talking!
- Learn more [here](#)
- Help section [here](#)

Instagram Live

- Built in function in the Instagram app or desktop with download of browser extension
- Broadcast up to one hour, then restart
- You can answer questions from viewers
- You can save your Live video session for sharing afterwards on social networks
- Learn how to start a IG Live video [here](#)
- Have friends or guests join you during your live broadcast. Learn more [here](#)
